

Club Warehouse Sizing Chart

- 75% of the population should begin with the "Original Strength" before advancing to the "Plus Strength".
- Large individuals may require the "Plus Strength" regardless of activity level to better support the chest area.
- The sizing chart does not take into account body type. If your height and weight put you near the boundary of two different sizes on the chart, those that are "tall and thin" should choose the smaller size, whereas those who are "short and stocky" should choose the larger size.
